Ted-Ed Student Talks Video: Student Speak: Bullying

Defining Components of Bullying

- Unwanted
- Imbalance of power
 - Social status, physical strength, ability, identity, etc.
- Repeated
- Intentional harm

Bias-Based Bullying

- Power imbalance and intentional harm based on social identities: race, ethnicity, religion, ability, gender, sexual orientation, socioeconomic status, etc.
- Often reflects larger society
- Impacts individuals and communities
- Response is often complicated by adult issues (awareness, beliefs, bias, fear, etc.)

Comprehensive bullying prevention includes the following:

School climate

Evidence-based curricula

Family and community partnerships

Data-based decision-making

Policy

Focus: School Climate

The learning conditions and quality of the school environment that affect attitudes, behaviors, and performance of both students and staff

“I never teach my pupils. I only attempt to provide the conditions in which they can learn.”

Impact of Bullying

Internalizing Symptoms

- Headaches
- Stomachaches
- Anxiety
- Depression

Externalizing Symptoms

- Lower grades and test scores
- Substance abuse
- Truancy
- Delinquency
- Aggression
- Self-harming behaviors

Impact of Bias-Based Bullying

Gender and Sexual Orientation

- LGBTQ+ students more likely to be targets of bullying
- Gay, male students 3x more likely to be targets than straight, male students
- Bullied LGBTQ+ students: 3x more likely to attempt suicide

These impacts underscore the importance of Gender Sexuality Alliances (GSAs) and district policies

Impact of Bias-Based Bullying (cont.)

Race and Ethnicity

- Numerical minority students more likely to be bullied
- Black and Latino students, in general, more likely to be bullied
- Race second most-cited reason for being bullied (appearance)

A notable protective factor: Greater ethnic diversity in schools = lower rates of bullying

Bullying Prevention and Education Grant (BPEG) Practice Profiles

BPEG Practice Profile: Positive School Climate		
Audience for this Practice Profile:	BPEG Implementation Team (BIT)	
Definition of Core Component:	The experience of students, families, and staff within a school that is marked by feelings of safety, trusting relationships, and a sense of belonging for all.	
How the Core Component is Essential to Reducing Bullying:	A positive school climate is foundational to effective bullying prevention. Research demonstrates a strong correlation between low levels of bullying and a positive school climate.	
Expected Use in Practice	Developmental Use	Unacceptable Use
The school supports all aspects of safety including physical, social, emotional, identity, and academic safety.	The school supports some aspects of safety but not all.	The school infrequently supports physical, social, emotional, identity, and academic safety.
All adults in the school immediately intervene in bullying situations.	Most adults in the school immediately intervene in bullying situations.	Some adults in the school immediately intervene in bullying situations and/or adults attempt to mediate bullying situations with the target and perpetrator together.
Staff actively supervise students in common areas (e.g., cafeteria) using a structured process.	Staff supervise students in common areas, but do not have a structured process for doing so	Staff are infrequently present in common areas when students are present and/or staff do not actively supervise students in common areas (e.g., staff chat with other staff)
Staff foster positive relationships between all members of the school community.	Staff are friendly to students and each another but do not make purposeful efforts to build relationships between all members of the school community.	Staff focus mainly on meeting academic performance goals with limited attempts to foster positive relationships between all members of the school community.
